Welcome to Port of Hvide Sande

Port of Hvide Sande

This is a service letter to vessels arriving to the Port of Hvide Sande.

Your vessel is now on its way to the Port of Hvide Sande. This document contains information that hopefully can assist you to have a pleasant stay at our port.

The Port of Hvide Sande is located on the following position $56^{\circ} 00' N 08^{\circ} 07' E$ directly at the Nordsee.

The port entrance can be entered during day and night. The Port of Hvide Sande aims to maintain a constant water depth at 7 meters in the port entrance.

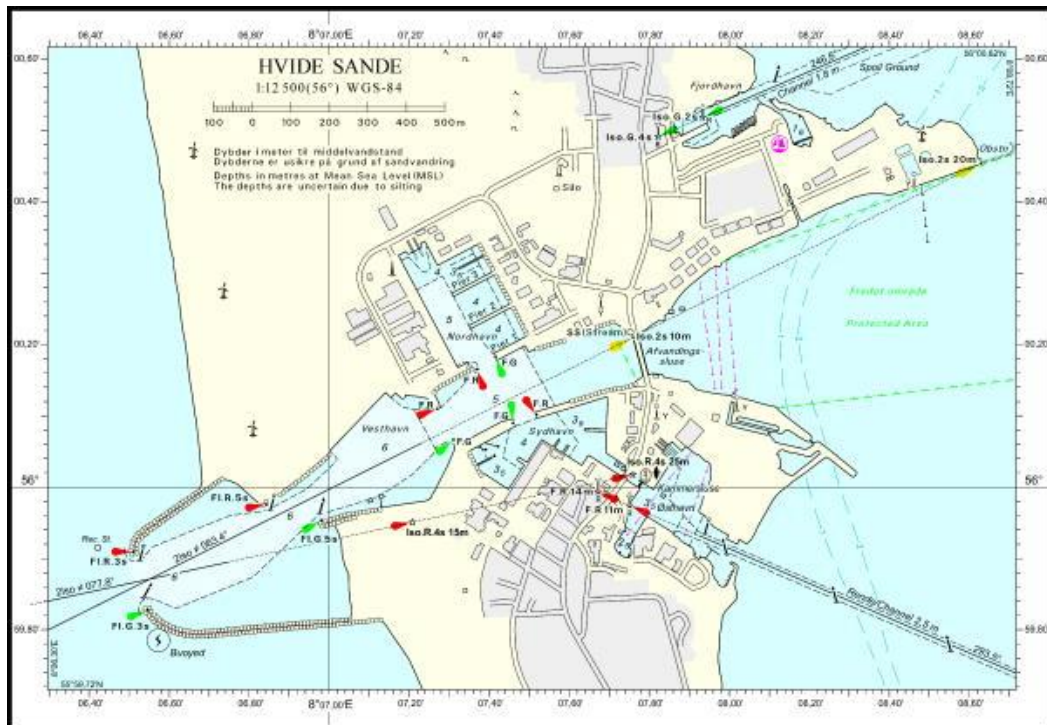

Under normal condition the average tide range is from -0.6 m to $+0.6$ m.

The port entrance between the two outer breakwaters is marked with two guideline light:

White: Iso. 2s, the guideline course direction is 61° .

Red: Iso. 4s, the guideline course direction is $77,8^{\circ}$.

Welcome to Port of Hvide Sande

On the inside of the breakwaters, two buoys are marking the lower end of the slope.

Pls. note there can be north- or south running tidal current outside the port entrance. Pls. contact the Port Control regarding updated info on current and waves.

Sluice.

There is a risk for a strong water-flow coming in or going out in port entrench, this comes from the drainage sluice. The Port Control will close the gates before arrival or departure of any ship, if requested. To avoid any strong water-flow from the sluice pls. make sure to inform the Port Control (Phone: +45 9731 1633) in good time regarding any arrival or departure of your vessel.

Water-flow signals from Sluice

For guidance on current water-flow conditions from the sluice, pls. note the following signals from a tower at the North end of the drainage sluice:

A green lantern over a white lantern means "inflow".

A white lantern over a green lantern means "outflow".

The Port entrance

There is a small risk for silting in the entrance of the Port. The Port of Hvide Sande's own dredger "TRÆL" is constantly working to create the best conditions for the entrance of the port.

Updated surveys of the entrance can be found on our website: <https://hvidesandehavn.dk/om-havnen/pejleplan/>

Welcome to Port of Hvide Sande

Pls. contact the Port Control for specific info on the recent surveys in the Port entrance.

Sailing

For navigation within the port area pls. follow the Danish Maritime Authority's terms mentioned in "Order on rules for navigation etc. in certain Danish waters"

Only with the following changes:

An outgoing ship must wait for the incoming ship. A vessel is considered as incoming, after it has given the signal for entry (one long tone).

When anchoring outside the harbor, ships must be aware of cables running from south of the harbor and towards the North West. It is recommended to anchor clear from the cables.

Contact

Vessels planning to call the commercial port in Hvide Sande, or vessels sailing under the ISPS terms must contact the Port Control 1 hour before arrival and 15 minutes before arrival.

Pls. provide the Port Control with the following information by first contact:

Vessel name, draft, cargo, purpose of the call and ETA.

Pls. contact the Port Control 15 minutes before departure or if any changes of recommended mooring quay are done.

Contact info on the Port Control:

Phone 24/7/365: +45 97 31 16 33

08:00 til 17:00 VHF Channel 12 or 16.

E-mail: portcontrol@hvshavn.dk

ISPS port section

The West Harbour (Vesthavnen) is located on the north side of the entrance within the leading piers, quay No. 110-111 (quay is 210 meters long). South of quay 100-111' is a turning basin, the diameter on this is 140 meters. The Industry quay (Industrikaj) is located in the north harbor, quay number 98 (100 meters long). Quay 11 is located on the south side of the inner harbor (forhavn) (Quay is 150 meters long). North of quay 11 is a turning basin, diameter is 120 meters.

There are no requirements in regards to which side of the vessel that should dock at the quay.

Pilot

Pilotage service at the Port of Hvide Sande is handled by DanPilot.

If a vessel is not familiar with the conditions, the Master of the vessel can order a pilot or contact the port control to get accurate information on the current conditions.

Conditions and information about pilotage can be found on www.danpilot.dk og by contacting DanPilot
